## Professional Summary

Senior Software Engineer with 10+ years of experience in scalable web application development and cross-functional team leadership, having delivered enterprise projects across e-commerce, healthcare, and insurance. Seeking new challenges to leverage my expertise in full-stack development, team leadership, and cloud architecture while working on cutting-edge technologies and impactful products that drive continuous growth and innovation.

## Technical Skills

**Programming languages:** JavaScript and TypeScript (7y), PHP (3y), Java (3y)

**Frontend:** VueJS 3, NuxtJS, React, NextJS, HTML5, CSS3, TailwindCSS, Bootstrap, FormKit, Vuetify, PrimeVue

**Backend:** Node.js, NestJS, Express.js, Laravel, WordPress, Spring MVC, Hibernate

**Database engines:** PostgreSQL, MySQL, MongoDB, MS SQL Server, Oracle, Redis

**DevOps:** Docker, Kubernetes, Jenkins, GitHub Actions, Nginx, Firebase, Vercel, Open Telemetry, Grafana, Prometheus

**AWS cloud platform:** IAM, Route53, EC2, S3, VPC, ELB, RDS, WAF, EKS, ECS, SNS, SQS, SES, CloudFront, Lambda

**AI Programming:** Claude Code, ChatGPT, Copilot, Cursor, BMAD method

**Integrations:** SOAP/RESTful API, GraphQL, RabbitMQ, gRPC

**Testing frameworks:** Mocha, Jest, Playwright, Selenium

## Professional Experience

### Senior Software Engineer / Squad Lead | CoverGo.com | Full-time — 04/2024 – Now (2y)

• Led and developed a low-code product builder enabling insurers to create customized insurance products across health, life, property, and casualty lines with minimal coding and configuration, reducing time-to-market from 1 month to 1 week

• Delivered robust data anonymization and deletion modules, including configuration, scheduling, reporting, and UI, supporting regulatory compliance and tenant-specific data policies

• Designed and implemented workflow wrapper module to integrate with Temporal, enabling seamless integration of complex business processes for building customer journey and background processing

• Leveraged AI development tools (Cursor with Claude models) to accelerate feature implementation by 40%

• Achieved Innovator Award 2024 for outstanding contributions to product innovation and development excellence

**Tech stacks:** Vue.js 3, NestJS, PostgreSQL, AWS, OpenAI API, TailwindCSS, Formkit, Keycloak, Temporal workflow engine

### Technical Lead | National Innovation Center | Full-time — 01/2023 – 12/2023 (1y)

• Delivered business connect platform supporting 15,000+ visitors during Vietnam International Innovation Expo 2023

• Recruited and managed development team of 7 members, establishing coding standards and development processes

• Led product demonstrations and collaborated with development team to analyze customer feedback and drive product improvements

• Established technical foundation and owned all aspects of product development lifecycle

**Tech stacks:** NuxtJS 3, NestJS, MongoDB, WordPress, AWS, Firebase, TailwindCSS, Ant Design

### Senior Software Engineer | Pangara AB | Full-time 04/2021 – 03/2023 (2y)

• Developed and customized platform based on Directus headless CMS, reducing project development from 2 weeks to 3 days

• Created custom extensions enabling non-technical users to build complex workflows and data management systems

**Tech stacks:** Vue.js, Node.js, Directus, TailwindCSS, Laravel, MySQL

### Team Leader | ICD Vietnam | Full-time 07/2020 – 04/2021 (10m)

• Built and led development team of 5 engineers for developing Japanese hypermarket corporation e-commerce platform

• Delivered 5 major modules including pickup system, sales reporting, reservation system, and loyalty campaigns

• Optimized data export process handling 32M+ records, reducing runtime from 4 hours to 1 hour

• Implemented automated deployment pipeline reducing deployment time from 4 hours to 30 minutes

**Tech stacks:** Node.js, TypeScript, Express.js, Angular.js, Google App Engine, Salesforce API

### Solution Architect & Pre-sale | FPT Software | Full-time 04/2018 – 06/2020 (2y 3m)

• Managed 10 developers across 2 major outsourcing projects, architected an AI-powered imaging web tool and a web-based dental platform using microservices design, helping clinics diagnose more accurately and work more efficiently

• Secured $1M contract with the top Korean dental company

• Led 4 PoC projects for Medical IT Expo Japan, showcasing PHR mobile app, EMR platform, blockchain-based medical data management and Pokemon Go-style mobile game

• Secured $1M PHR project from the top-2 medical equipment company by delivering on-site technical consultation and solution design in Japan

• Conducted technical workshops and sharing sessions for 50+ company developers and technical leads

**Tech stacks:** PHP CodeIgniter, Vue.js, Laravel, Node.js, AWS Serverless, Java Android, Swift, Unity

### Senior Software Engineer | NTT DATA | Full-time 04/2016 – 04/2018 (2y)

• Developed clinic search and integrated maps features for icashica.com dental marketplace platform

• Led database migration from MS SQL to Oracle, improving query performance from 10 seconds to 1 second

• Mentored junior developers and conducted knowledge transfer sessions for team skill development

**Tech stacks:** Java, Spring MVC, Oracle, Terasoluna Framework

### Software Programmer | FPT Information System | Full-time 07/2015 – 12/2015 (6m)

• Developed custom programs based on customer requirements and basic design specifications

• Created and maintained technical documentation ensuring 100% compliance with design review standards

**Tech stacks:** SAP ABAP

## Projects

### Senior Backend Engineer | Kasha.io | Contractor 10/2024 – 07/2025 (10m)

• Initiated and architected booking module backend from inception through design, implementation, and MVP launch

• Implemented microservices architecture using gRPC and RabbitMQ for inter-service communication

**Tech stacks:** NestJS, gRPC, RabbitMQ, PostgreSQL, Google Integrations, MinIO

### Founding Engineer | Breezing.In 12/2023 – 05/2024 (6m)

• Initiated and built MVP of all-in-one event / booking management platform serving 1,000+ users within 3 months of launch

• Secured partnership with Tech in Asia for organizing Saigon Summit 2024 by providing offline check-in solution

**Tech stacks:** NuxtJS 3, NestJS, MongoDB Atlas, AWS (EC2, S3, CloudFront), TailwindCSS, PrimeVue

### Technical Lead | United Nations Convention against Cybercrime | Contractor 07/2025 – 11/2025 (4m)

• Led development of CMS and online registration platform for 2025 Hanoi Convention, supporting 1,500+ VIP international organizations and attendees

• Architected, consulted and collaborated with government agency from requirements gathering to design and implementation of secure, scalable solutions

• Integrated self-hosted email server for automated notifications and developed attendee management dashboard

**Tech stacks:** WordPress, NextJS, NestJS, MySQL, MinIO, On-premise K8S deployment

## Education & Certifications

**Bachelor of Engineering, Information Systems | FPT University Ho Chi Minh Campus** 2011 – 2015

*Capstone Project Lead* managed 4 members to build
the marketplace platform that allows users to find / book / communicate / pay for truck's owners

**Master of Business Administration | University of Paris I: Panthéon-Sorbonne** 2021 – 2023

*Best Dissertation Award* for consultancy project on
"Improving Remote Work Productivity: The practice of Clik - A tech company in Vietnam"
